

PNM Multifamily Energy Efficiency Program

Air Conditioning and Chiller Rebates

These units have been on this roof for 40 years. PNM can help retire them and save you money and energy.

Summer is coming: Save money on A/C upgrades

According to NOAA, New Mexico has a 50-60% change of above average temperatures this summer. Luckily, the PNM Multifamily Energy Efficiency Program offers rebates for high-efficiency air-conditioning (A/C) installation and replacement.

- Individual and central A/C systems can earn \$40-175
- **New for 2018:** Central chiller replacements can earn \$0.30/kWh saved

10% Deep-Savings Boost*

Projects that install upgrades from one or more of the following categories may be eligible for a 10% deep-savings incentive bonus.

- Pool pumps
- Appliances
- Domestic Hot Water
- Building Envelope
- Lighting
- Space Heating and/or Cooling

Pair an A/C upgrade with another category and your project is well on its way to earning an additional 10% bonus incentive from PNM. Contact us at multifamily@pnm.com for more details.

*Some restrictions apply. See [Participant Handbook](#) at pnmultifamily.com/qualify-your-property for more details. All projects require eligibility confirmation from [PNM Multifamily Energy Efficiency Program](#). Rebate offers are subject to program approval and available funds.
